

# PixTOOL Push LED™ - Instruction for use

PixTOOL™ is a trademark from PIXLUM®

Read before use

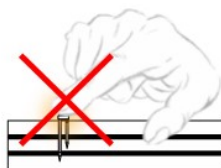

18-04-2015

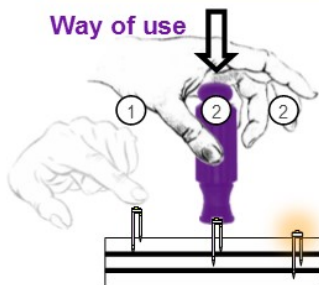

PixTOOL PUSH LED™ facilitates the insertion of PixLEDs™

## Foreword

- ▶ Don't insert the **PixLED™** lighting elements by hand. Always use the **PixTOOL PUSH LED™** tool.
- ▶ You'll be able to tack the LEDs without hurting yourself, especially if you have a lot of them to insert.

## Way of use

- ▶ Use the **PixTOOL DOUBLE™** tool to pre-perforate your **PixBOARD PLASTER™** panel. This step is not necessary with **PixBOARD FOAM™** panels.
- ▶ Position the **PixLEDs™** in the marks left by the **PixTOOL DOUBLE™** tool in the **PixBOARD PLASTER™** board or anywhere on the **PixBOARD FOAM™** panels. Finish the insertion by softly pushing the **PixLEDs™** straight into the panel down to their base with the **PixTOOL PUSH LED™** tool.

## Caution

- ▶ Take care not to bend or break the pins of the **PixLEDs™** by forcing the insertion. Replace damaged **PixLEDs™**.
